**Education Statistics Quarterly**, 2003 *Mathematics Teachers at Work* Janine T. Remillard, Beth A. Herbel-Eisenmann, Gwendolyn M. Lloyd, 2011-09-20 This book compiles and synthesizes existing research on teachers use of mathematics curriculum materials and the impact of curriculum materials on teaching and teachers with a particular emphasis on but not restricted to those materials developed in the 1990s in response to the NCTM s Principles and

Standards for School Mathematics Despite the substantial amount of curriculum development activity over the last 15 years and growing scholarly interest in their use the book represents the first compilation of research on teachers and mathematics curriculum materials and the first volume with this focus in any content area in several decades *Handbook of Research on Driving STEM Learning With Educational Technologies* Ramírez-Montoya, María-Soledad, 2017-02-01 Educational strategies have evolved over the years due to research breakthroughs and the application of technology By using the latest learning innovations curriculum and instructional design can be enhanced and strengthened The Handbook of Research on Driving STEM Learning With Educational Technologies is an authoritative reference source for the latest scholarly research on the implementation and use of different techniques of instruction in modern classroom settings Featuring exhaustive coverage on a variety of topics including data literacy student motivation and computer aided assessment this resource is an essential reference publication ideally designed for academicians researchers and professionals seeking current research on emerging uses of technology for STEM education *Resources in Vocational Education* ,1977 **Research in Education** ,1969 **Homework, Learning and Academic Success: The Role of Family and Contextual Variables** Antonio Valle, Susana Rodríguez, Pedro Rosário, Mar Lorenzo Moledo, 2020-02-24 The main purpose of this Research Topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework This will require studying the role played by teachers students and families in order to ensure that schoolwork is a useful learning tool Although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework However the time spent on homework is not in itself evidence of the student's involvement nor is time spent indicative of quality time Indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence It is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation In tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central players in the process of completing homework assignments The decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student's motivation and the student's level of engagement with homework Furthermore the fact that homework is useful interesting and motivating for students will depend on how the teacher prescribes those tasks and the connection established with classroom learning Teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework Lastly the effectiveness of teacher feedback depends on its contribution to the student's educational progress and how that student will perform in the future In addition to the student who performs the task and the teacher who prescribes and corrects it we must not lose sight of parents' role Although there are discrepancies

regarding the role that parents play in relation to homework it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out Everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties In this way providing emotional support encouraging children to get involved can contribute positively to improving their motivation and interest in the performance of homework The objective of this Research Topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process its prescription and correction Overall we aim to cease making homework a source of conflict and controversy at the socio educational level in order to provide useful instruments for improving the quality of student learning This work was developed with the financing of the research projects EDU2013 44062 P MINECO EDU2017 82984 P MEIC      *Linguistics and Language Behavior Abstracts* ,1996
