Carvalho,2024-03-22 Nesta edição foram acolhidas as recentes alterações ao Código de Processo Penal que incidiram designadamente sobre o tratamento das vítimas de terrorismo e sobre o direito de nomeação de intérprete e de tradução de documentos essenciais para o exercício da defesa. Tivemos ainda em atenção o vasto leque de diplomas que atingiram o Código Penal os quais se dedicaram entre outros ao reforço e proteção das vítimas de crimes contra a liberdade sexual. No plano da legislação extravagante conexa com o processo penal destacamos a Lei nº 18/2024 de 5 de fevereiro que regula o acesso a metadados referentes a comunicações eletrónicas para fins de investigação criminal. Daniela Corbetta, Jacqueline Fagard,2017-09-05 Since the discovery of mirror neurons, the study of human infant goal directed actions and object manipulation has burgeoned into new and exciting research directions. A number of infant studies have begun emphasizing the social context of action to understand what infants can infer when looking at others performing goal directed actions or manipulating objects. Others have begun addressing how looking at actions in a social context or even simply looking at objects in the immediate environment influence the way infants learn to direct their own actions on objects. Researchers have even begun investigating what aspects of goal directed actions and object manipulation infants imitate when such actions are being modeled by a social partner or they have been asking which cues infants use to predict others' actions. A growing

understanding of how infants learn to reach perceive information for reaching and attend social cues for action has become central to many recent studies These new lines of investigation and others have benefited from the use of a broad range of new investigative techniques Eye tracking brains imaging techniques and new methodologies have been used to scrutinize how infants look process and use information to act themselves on objects and or the social world and to infer predict and recognize goal directed actions outcomes from others This Frontiers Research topic brings together empirical reports literature reviews and theory and hypothesis papers that tap into some of these exciting developmental questions about how infants perceive understand and perform goal directed actions broadly defined The papers included either stress the neural motor or perceptual aspects of infants behavior or any combination of those dimensions as related to the development of early cognitive understanding and performance of goal directed actions *MotorBoating* ,2004-01 **Modeling Play in**
