Understanding Deviance Tammy L.

Anderson, 2014-01-23 In this collection of 48 reprinted and completely original articles Tammy Anderson gives her fellow instructors of undergraduate deviance a refreshing way to energize and revitalize their courses. 36 are reprints, 12 are original to this text anthology. First in 12 separate sections she presents a wide range of deviant behaviors, traits, and conditions including underage drinking and drunk driving, doping in elite sports, gang behavior, community crime, juvenile delinquency, hate crime, prison violence, and transgendered prisoners, mental illness, drug using women, and domestic violence, obesity, tattooing, sexual fetishes, prostitution, drug epidemics, viral pandemics, crime control strategies, and racial inequality, gay neighborhoods, HIV, and bugchasers, and lastly youth, multicultural identity, and music scenes. Second, her pairing of classic and contemporary viewpoints about deviance and social control not only connects important literatures of the past to today's student readers, her connections framework also helps all of us see social life and social processes more clearly when alternative meanings are accorded to similar forms of deviant behavior. We also learn how to appreciate and interact with those who see things differently from ourselves. This may better equip us to reach common goals in an increasingly diverse and ever-changing world. Third, a major teaching goal of Anderson's anthology is to sharpen students' critical thinking skills by forcing them to look at how a deviant behavior, trait, or condition can be viewed from opposing or alternative perspectives. By learning to see deviance from multiple perspectives, students will better understand their own and others' behavior and experiences and be able to anticipate future trends. Balancing multiple perspectives may also assist students in their practical work in social service, criminal justice, and other agencies and institutions that deal with populations considered deviant in one way or another.
