Office, 2011-09-14 It is clear that means testing will be used extensively for the foreseeable future as it helps target state support at the people that need it most but it can have many other important consequences For example there can be disincentives for recipients of means tested benefits to return to work Means testing also makes the administration of benefits more complex and is associated with higher costs as well as increased rates of fraud and error In light of proposed and ongoing reforms to benefits and related programmes the NAO notes the importance of departments sharing good practice and learning from past experiences in the design of means tests For example HM Revenue and Customs has struggled in the past with unexpectedly large overpayments of tax credits 9 billion between 2003 04 and 2009 10 because of the way that payments are determined under the legislation Departments need to consider all of the impacts of means testing for example the burden on claimants such as difficulty with completing forms and the cost of requesting advice Issues associated with means testing such as incorrect declarations of earnings and errors by officials in calculating entitlements accounted for over half of all fraud and error in benefits and tax credits There is a lack of coordination of and overall accountability for means testing across government For example no one body has responsibility for looking at how the impact

of university fees will be influenced by wider means testing
