Mital,Å. Kilbom,S. Kumar,2000-01-31 There is an urgent need to disseminate ergonomics know how to the work place This book meets that need by providing clear guidelines and problem solving recommendations to assist the practitioner in decisions that directly protect the health safety and well being of the worker The guidelines have evolved from a series of symposia on Ergonomic Guidelines and Problem Solving Initially experts in each area selected were asked to write draft guidelines These guidelines were circulated to participants at the symposia and to other experts for review before being comprehensively revised In some instances these guidelines cannot be considered complete but it is important now to put some recommendations forward as guidelines It is hoped that as new research emerges each guideline will be updated Each guideline has been divided into two parts Part I contains the guidelines for the practitioner and Part II provides the scientific basis or the knowledge for the guide Such separation of the applied and theoretical content was designed to facilitate rapid incorporation of the guide into practice The target audience for this book is the practitioner The practitioner may be a manager production system designer shop supervisor occupational health and safety professional union representative labor inspector or production engineer For each of the guidelines relevant practitioners are described Topics covered include work space design tool design work rest schedules illumination and maintenance **17,000 Classroom Visits Can't Be Wrong** John V. Antonetti,James R. Garver,2015-02-20 Most educators are skilled at planning instruction and determining what they will do during the course of a lesson However to truly engage students in worthwhile rigorous cognition a profound shift is necessary a shift in emphasis from teaching to learning Put another way we know that whoever is doing the work is also doing the learning and in most classrooms teachers are working much too hard Authors John V Antonetti and James R Garver are the designers of the Look 2 Learning model of classroom walkthroughs They ve visited more than 17 000 classrooms examining a variety of teaching and learning conditions talking to students examining their work and determining their levels

of thinking and engagement From this vast set of data they ve drawn salient lessons that provide valuable insight into how to smooth the transition from simply planning instruction to designing high quality student work The lessons John and Jim have learned from their 17 000 and counting classroom visits can t be wrong They share those lessons in this book along with stories of successful practice and practical tools ready for immediate classroom application The authors also provide opportunities for reflection and closure designed to help you consider or reconsider your current beliefs and practices Throughout you will hear the voices of John and Jim and the thousands of students they met as they provide a map for shifting the classroom dynamic from teaching to learning
