International Taxation of Income from Services under Double Taxation Conventions Marta Castelon, 2016-04-24 The provision of international services has increased enormously mainly due to the precipitous growth of the digital economy Accordingly the interpretation and application of double taxation conventions DTCs to income from services has become a dominant focus in the international taxation This multiple award winning book is an indispensable tool for practitioners and a major contribution to the debate about tax reform It responds to the need for a comprehensive overview of the tax opportunities and risks relating to the provision of international services It also offers the first in depth analysis of the taxation of income from services vis-à-vis the multilateral instrument MLI resulting from the OECD's Base Erosion and Profit Shifting BEPS initiative With the thorough analysis of the international taxation of income from services over the last two centuries the author sheds new light on present tax policy debates and develops workable proposals for bringing brick and mortar DTCs into the digital reality With an abundance of case studies treaty interpretations appraisals of policy discussions and practical solutions the author examines every aspect of the subject including the following the Model DTCs of the OECD the United Nations Germany and the United States their similarities and differences relationships among the MLI the Model DTCs and specific DTCs development of the provisions dealing with services in the DTCs how tax authorities and courts of different countries e.g. the United States Germany Brazil India and China apply DTC provisions on the taxation of international services opportunities and risks relating to different business practices such as the subcontracting of services provisions the hiring out of labour the secondment of employees and the engagement of contract and toll manufacturers practical questions about the taxation of different distribution models from fully fledged distributors to commissionaires challenges and proposals relating to the differentiation between various types of services under DTCs the permanent establishment concept to what extent the structure purposes and scope of DTCs differ from those of the General Agreement on Trade in Services GATS how changes in the US Model DTC of 2016 affect international service provisions and proposed changes to amending the OECD

and UN Model DTCs Viable proposals to simplify DTC provisions dealing with service income and align them with current challenges such as the digital economy and the increasing volume of remote services are offered particularly in light of the likely impact of the BEPS package and its subsequent MLI This book is poised to become one of the key practice resources for tax lawyers in house counsel and policymakers in the coming years Interested academics too will benefit from the author's skill in recognizing the ongoing role of taxation fundamentals in the major revolution currently underway Urban Development and Planning Bikram Pattanaik, 2025-03-20 This book details the most contemporary concerns related to urban development governance and planning as well as the challenges to urban administration It analyses the policies and programmes adopted by both high income and lower middle income countries to achieve sustainable urbanization and their application and treatment to help students get a holistic practical perspective of the issues at hand This volume elucidates urban development theories and approaches coupled with urban planning local government finance urban management and urban governance It also discusses urban issues and challenges such as education health waste management land use planning housing and transport Critical concerns related to urban water bodies open spaces urban heritage and smart cities and urban future are similarly addressed This book will be useful to students researchers and teachers of urban planning and architecture urban sociology economics geography environmental science and public administration It shall also be useful to NGOs parastatal bodies and trainers of urban planning and development Planners policymakers functionaries and elected representatives of urban local bodies may also use this book as a capacity building instrument **Non-discrimination and Trade in Services** Catherine A. Brown, 2017-05-02 This book argues that the proliferation of global trade and the increasing power of free trade arrangements leave income taxes as one of the few remaining measures that can potentially be used for protectionist purposes It analyzes the interaction between the non discrimination principles in tax treaties and trade related agreements including multilateral WTO regional NAFTA AANZTA and bilateral free trade agreements The absence of a non discrimination obligation with respect to tax measures that apply to non resident service providers and to non resident services may therefore significantly undermine trade obligations The book clearly reveals how these tax barriers to trade may unfairly or unnecessarily restrict trade in services and puts forward a new more effective non discrimination obligation in tax matters to be included in tax treaties one that would more closely parallel the non discrimination obligations in trade agreements The book examines the concept of non discrimination in tax matters from several perspectives specifically a North American and Australian perspective as well as a perspective based on EU and UK law focusing on the interaction between these legal systems bilateral tax treaties regional trade agreements and where relevant the General Agreement on Trade in Services GATS The book explores the possibility of a reciprocal influence between tax treaties and trade agreements and poses the question as to whether tax treaties might do more in providing a non discrimination principle in the cross border trade in services div Master Federal Tax Manual ,1990 **CJEU - Recent Developments in Value Added Tax**

2021 Georg Kofler, Michael Lang, Pasquale Pistone, Alexander Rust, Josef Schuch, Karoline Spies, Claus Staringer, Ilze Kuniga, 2023-01-11 The most important and recent judgments of the CJEU Considering the ever increasing importance of indirect taxation as a source of revenue for governments the intensifying complexity of the legal framework and the proliferating number of countries adopting indirect taxation it is essential to scrutinize how the law is applied in practice The primary driving force in this area is undoubtedly the Court of Justice of the European Union This book analyses selected topics e.g. taxpayer rights in EU VAT law bad debt and insolvency in VAT law taxable base and rates exemptions and deductions by examining the most prominent and recent judgments of the Court of Justice of the European Union Experts from all over the world not just from academia but also government and judiciary representatives as well as tax practitioners have provided their input and helped us compile what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis **3** BPP Learning Media, 2012-12-01 A Core Study Text for the ATT Qualification

Healthcare Valuation, The Financial Appraisal of Enterprises, Assets, and Services Robert James Cimasi, 2014-03-24 A timely look at the healthcare valuation process in an era of dynamic healthcare reform including theory methodology and professional standards In light of the dynamic nature of the healthcare industry sector the analysis supporting business valuation engagements for healthcare enterprises assets and services must address the expected economic conditions and events resulting from the four pillars of the healthcare industry Reimbursement Regulation Competition and Technology Healthcare Valuation presents specific attributes of each of these enterprises assets and services and how research needs and valuation processes differentiate depending on the subject of the appraisal the environment the property interest exists and the nature of the practices Includes theory methodology and professional standards as well as requisite research analytical and reporting functions in delivering healthcare valuation services Provides useful process tools such as worksheets and checklists relevant case studies plus a website that will include comprehensive glossaries and topical bibliographies Read Healthcare Valuation for a comprehensive treatise of valuation issues in the healthcare field including trends of compensation and reimbursement technology and intellectual property and newly emerging healthcare entities **Special Features of the UN Model Convention** Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention's unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are

the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master s theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD s BEPS project on the UN Model
